Java 21 Architecture & Virtual Threads • INSTRUCTOR ANSWER KEY

Course: Java 21 • College: DPU • Student Name: _____

Q1. Which runtime construct is introduced in Java 21?

```
try (var pool = Executors.newVirtualThreadPerTaskExecutor...
    IntStream.range(0, 10).forEach(idx -> {
        pool.submit(() -> {
            Thread.sleep(Duration.ofMillis(50));
            return idx * 2;
        });
    });
}
```

[CORRECT] A) Managed lightweight runtime scheduler

B) Static manual thread preemption

C) Unbuffered heap allocation

D) Deprecated bytecode interpreter

Key: A (Grounded in Slide 2) — Grounded in Slide 2: Virtual Thread Per Task Executor
